

March 10, 2022

Fifteenth day of the war. Apart from our minor counterattacks, such as near Kharkiv, where we occupied the town of Dergachi, the front stabilized by cutting off a group of their troops near Kharkiv. They did not move further and actually stopped.

For the third day fascists announce attack on Mykolaiv, but don't come. Today, the governor of the region Vitaly Kim even announced a green corridor for them to surrender. For all those who did not fire, however, this does not apply to the gunners and rocket launchers who shelled the city, for whom now there are only two way – either to flee or to the ground. The entire Internet is filled with how prisoners in Ukraine are treated in accordance with the Geneva Conventions, and currently here there are about 700 of them. They themselves are very surprised by this and often say that they were treated worse in their own army.

Unable to advance, they focused on bombing our cities with special force. They bomb everything they can reach, and this is the same list of cities – in the northeast – Severodonetsk, Lysychansk, Rubizhne, which remain under the control of our army. For which they are bombed. In the east it is Chernihiv, Sumy, Okhtyrka, Lebedyn, Kharkiv and especially Izyum. As always, they carry out air raids and shelling of Kyiv, but somehow sluggishly. And Kyiv probably has the best air defence, so they are being shot down more and more successfully here. Both planes and missiles.

They are especially angry about Mariupol. They were pushed out of Kharkiv, so they set out for Mariupol. In addition to yesterday's shelling of the maternity hospital and children's hospital, today at 8 am they fired on the Mariupol Technical University and the Drama Theater. Since 2015, we have held our volunteer seminars at this university and had lunch at the Sito Piano restaurant, which is now a funnel, seems to be the same as near the maternity hospital with a diameter of 10 meters. But the most important thing is not even that. There has been no electricity, no heat, no water, and no mobile communications in the city for 10 days. And outside is the winter and today the forecast is -10 C. Even in Kharkov there was and is mobile communication and in many areas there is electricity, heat and water and the city hall restores them where there is none. It is possible to evacuate and deliver humanitarian goods from Kharkiv, as Kharkiv is not surrounded.

Mariupol is completely surrounded, the Nazis consistently and deliberately cut it off from heat, electricity and water somewhere on March 1. They do not allow evacuation from there and food and medicine to be delivered there. They are not just destroying the city, they are punishing it. Because all 8 years of the war from 2014, when Mariupol defended itself and did not allow to become a part of ORDLO, it created a bright and for Russia unfavourable contrast with Donetsk, which the Russians occupied in 2014. Therefore, now the Nazis apply the practice developed in Chechnya and Syria. And it is not just the physical destruction of civilians, it is their ossification, bringing people to such despair when they agree to slavery and humiliation. We see everything and the whole country is praying for Mariupol today.

There is a very large party organization here and in general a lot of prominent people and just friends, and today we not only cannot help them, but also find out what's wrong with them. Well, this is the technology of bringing everyone to the state of victim. Preferably a victim who agrees to everything. As Putin said at a briefing with Macron a week before the war: "You like it, You don't like it – be patient, my beauty!" Quoting a Moscow song about having sex with a dead woman. At that time, everyone in the West was shocked by such a sentence with an openly violent taste, but in fact, it turns out, he simply announced his program of action concerning Ukraine. However, thanks to the Armed Forces of Ukraine, he is unable to do so with the whole of Ukraine, so he is still satisfied with Mariupol.

It is noteworthy that such fascist inhumanity is manifested by the Moscow authorities not only in relation to Ukrainians, to whom they can reach. We are shocked by their treatment of their killed, who now number more than 12,000 according to our General Staff. In the first 10 days of the war, when active hostilities were developing, they lost more than 1,000 dead a day. And only in the last days, when significant military operations ceased, this figure froze. But after the first 5 days of the war, Deputy Prime Minister of Ukraine Iryna Vereshchuk tried to hand over the bodies of the dead to the Russian Federation. They refused to do that. Apparently, this was not the case in any army.

Yesterday, the whole country traditionally celebrated Taras Shevchenko's birthday, who commanded us: "Fight, win!" So, we live and fight.

God, save Ukraine and Mariupol, as well as our beautiful planet! Everything will be Ukraine!

March 9, 2022

Fourteenth day of the War

From the tragic:

1. As a result of the air raid of fascist aircraft on Mariupol, the maternity hospital with mothers and newborns and the city hospital were bombed! Data on the dead and wounded are now being clarified. This is a direct result of the open sky and until the sky is closed they will continue to INTENTIONALLY bomb maternity hospitals and hospitals. This is their concept of the army. They avoid direct combat with the enemy's armed forces, but destroy civilians in order to force civilians and the army to subdue their atrocities and threats of even greater atrocities. They are terrible only when they are at war with the unarmed population, and when they are taken prisoner (who is lucky) they cry and repent. During these 10 days, when Mariupol was at the epicenter of the fighting, 1,300 people died, including children. By the way, the evacuation from Mariupol did not take place today. It is such a Russian folk pastime to play evacuation.
2. Being completely uncivilized and inadequate, they cut off the Chernobyl nuclear power plant, where the shelter is located. This, too, is not amenable to rational comprehension. Just savages are incurable. As a result, the city of Slavutych, where the Chernobyl workers live, is without electricity, and the regular work of shelters is under threat, which poses a threat not only to Ukraine but to the whole of Europe.
3. Fascist orcs entered the city of Skadovsk, Kherson region. They broke into the city council, expelled the mayor and city hall employees, and confiscated and took away the city hall's computers. Instead, they occupied the city hall themselves, as if they were in power. The mayor was instructed to ensure that there was no resistance.
4. The Rosguard, the Russian punitive police force, was brought to Kherson itself. To date, 400 Kherson residents have been illegally arrested for organizing rallies and demonstrations against the occupiers. To this end, the Russian fascists seized the Kherson prison, released the prisoners and prepared it for the dissenting free Khersonites. They think they have Russia here.
5. Actually, they arranged Russia in the northern districts of Kiev region. There are no bombings, but there is real genocide. The local population is treated brutally – people are thrown out of their homes in the cold so that the occupiers can live in their warm homes, and those who do not like it are shot. They rape women, rob everything they like. Now there is something that pervades the cold horror, and in comparison with which the bombings of maternity hospitals are flowers. Of course, we have known for centuries that a wild horde lives to the east of us, no matter what costumes it wears and what gadgets it uses. Outwardly, they always pretend to look like civilized people, but this is like a horde, where human life is "camp dust" and only one person is a king, and has remained a horde.

But even for us, open and brutal fascism came as a surprise in the 21st century, after the tragedy of the Second World War, from which humanity learned the most important lesson – "Never again!!" For a while, we couldn't believe it either, if it weren't for such a tragic obvious.

6. As every day, Mariupol, Kyiv, Chernihiv, Sumy, Zhytomyr, Kharkiv, Okhtyrka, Izyum, Uman were bombed. A dormitory and a bakery were bombed in Zhytomyr. Every day after such bombings there are dead and wounded. Today only in Sumy there are 22 of them, in particular the world champion among juniors in some kind of fight, the teenager, and together with all family was lost. Alexander Krasnoyartsev, one of the pilots of such a bomber, who was shot down over Chernihiv and taken prisoner, testifies that he was given the task of bombing residential areas and social facilities - schools, hospitals, etc. non-target shells in order to defeat civilians as much as possible.

7. Today, after the city of Okhtyrka in the Sumy region, the city of Izyum in Kharkiv was demolished. It is also completely destroyed. As there was virtually no city left, the Ukrainian authorities negotiated with the fascist occupiers about green corridors for the evacuation of civilians. As always, they agreed, as always, with the beginning of the evacuation, shelling began. Therefore, the evacuation, unfortunately, did not take place.

From the positive:

1. Last night the Russian invaders announced attack on Mykolayv. The morning came. They did not attack. Why would that be? The head of the Mykolayv military administration Vitaly Kim and the Ukrainian military are disappointed.

2. Finally managed to evacuate four of the six agreed with the Russian Nazis. First, this is the scariest zone – the defensive arc around Kyiv: Gostomel, Bucha, Vorzel, Irpin. It was especially critical to remove the orphanage of 55 children and 27 of their educators from Vorzel. Succeeded! Secondly, two evacuation columns of civilians from Sumy are about 5,000 civilians, of which 1,000 are foreign students, mostly from Turkey, India and China.

Third, they are civilians from half-destroyed Chernihiv. Finally, the evacuation of Energodar from the city of Zaporizhzhya nuclear power plants, which was stuck near Vasylivka and did not seem to be allowed by the occupiers to Zaporizhia, but, fortunately, it succeeded. Although nowhere in these four corridors did they allow the return of Ukrainian humanitarian goods with food and medicine in the opposite direction. And here we should not be surprised, because fascism is fascism. We are witnessing their policy towards all the territories they have temporarily occupied. It is their tool of humiliation to force the local population, for whom they have created the conditions of a humanitarian catastrophe, to take only their handouts from hopelessness.

3. Near Kharkiv, in the Dergachi district, their artillery units were defeated, so that they fled and left their artillery, from which they fired on the suburbs of Kharkiv and fled to their territory outside Ukraine.

The most important thing today is that my brother miraculously called me from the temporarily occupied areas around Mariupol and said that he is alive...

So we keep calm, hold on, help the army.

Everything will be Ukraine!

March 08, 2022

Thirteenth day of the war.

From the tragic:

1. Last night the Russian Nazi occupiers were driven out of Izyum, a city in the northeast of Kharkiv region, for which they turned the city into a complete ruin in the morning – they bombed everything from the city hall and central hospital to the vast majority of houses. 27 civilians died in Kharkiv today! And in the Kharkiv Ecopark, the occupiers killed volunteers who came to feed the animals.
2. As usual, we carried out the bombing of our key cities for Kyiv – Chernihiv, Sumy, Okhtyrka, Kharkiv, Mariupol, Kyiv. In Kharkov, among others, the consulates of Albania, Slovenia and Azerbaijan were destroyed. And in Mariupol – the Greek consulate.
3. The Russian Nazi occupied the cities of the defensive arc around Kiev – Bucha, Gostomel, Irpin and went to the suburbs of Kiev. For them, this is the main direction of the strike, because the main target of this stage of the war is Kyiv.
4. On the third day, the Mariupol authorities made a third attempt to evacuate civilians from the city in agreement with the Russians. And for the third day in a row, instead of evacuating, they fired on the agreed "green corridor", not allowing people to be taken out of Mariupol. It seems that this is their entertainment. In general, they consider the care of civilians a weakness and always blackmail threats to the security of civilians. Thus, the Ukrainian military exchanged approaches to Mariupol for the safety of evacuation, which they used for the offensive. No comments. On the fourth day, 400,000 people live under shelling and bombing without heat, light, gas, water and mobile communications and the Internet. The temperature outside is –4, and the heating does not work in the apartment building! And all attempts of public utilities to establish it come to an end with the next bombing which destroys all these efforts and in general all other systems of life support of the city. In fact, with regard to all the cities they attack, they are pursuing this policy of genocide, while not allowing civilians to be deported and deliberately preventing this. This is outright mockery of people and flaunting their savagery.
5. In the temporarily occupied territories of Kherson, Mykolaiv, Donetsk and Luhansk regions, people began to disappear, especially those who protested against the occupation. Ukrainian mobile communications and Ukrainian media channels were cut off there. Gradually, not only mass terror begins against large Ukrainian cities that do not surrender, but also against protesting people.

On the positive side:

1. Two columns of civilians were taken out of the besieged city of Sumy to the still peaceful and Ukrainian Poltava.
2. A special unit of the Ukrainian army carried out a successful operation to destroy the commander of the Kharkiv group of Russian-Fascist troops, General Gerasimov, together with his staff, which significantly neutralized this group, which was left without command. They are not up to the offensive. And this is the third general of the Russian Federation, destroyed in less than two weeks of the war.
3. Fights for Mykolayv with variable success proceed. Yesterday they were driven out of the outskirts of the city, now they are preparing for the assault, concentrating their forces in this direction. In the morning we will see the results.
4. The pace of the offensive of the Russian orcs, who are suffering unprecedented losses that have already exceeded their losses in both Chechen wars, has slowed down significantly.

Hold on!

March 7, 2022

Twelfth day of the War.

Today there is a long "operational pause" - they can no longer come, and we cannot come yet.

From the tragic - shooting "green corridors", which they themselves agreed the day before. The worst situation is in Mariupol - there is no connection with it at all. There is no electricity, no heat, no water. He is now being destroyed even worse than Kharkiv, which is being punished for the song about Putin, which was born there, explaining who he is in the sense of a male sexual organ.

The northern approaches to Kyiv are a defensive arc: Borodyanka, Vorzel, Bucha, Irpin, Gostomel. There is now scorched earth, everything is destroyed, but there are still a lot of civilians. This morning the mayor of Gostomel Yuriy Prylypko together with his team began to distribute food and medicine to the residents – everyone was shot. The mayor of Bucha Anatoliy Fedoruk was wounded. They were not military. This is really fascism.

During the 12 days of the war, 211 schools, 36 hospitals, 1,500 residential buildings were destroyed, not to mention gas pipelines, power substations and thermal power plants, as well as water utilities. They are destroying this primarily to stifle large cities and force them to capitulate. But no city has surrendered yet. Even those in temporary occupation are resisting. By the way, the group that was defeated in the Kharkiv and Sumy regions was discovered by units of the Rosguard - police troops who are dispersing peaceful rallies in Russia. Apparently, their task was to tame people from the temporarily occupied territories of Ukraine.

On the positive side. Not even one news:

1. In the Kharkiv and Sumy regions, our Army defeated a large group that regrouped and was to go to Kyiv. It no longer exists.
2. In Chornobayevka, Kherson region, where there is a military airfield, where Russian fascists drove helicopters from the Crimea to make it easier to bomb Ukrainian cities, skillfully conducted an operation that destroyed them all. About 30 helicopters!
3. They rejected orcs from Mykolayv and recaptured the Kulbakino airport near Mykolayv.
4. At the cost of their lives, Ukrainian sailors lined up the latest flagship of the Russian fleet, Vasily Bykov, the leading ship of the squadron that threatened to land in Odessa. He sank.
5. 67,000 Ukrainians returned from work in Europe to defend Ukraine. The first soldiers of the Foreign Legion also arrived in Ukraine and receive combat missions.

We thank our defenders and pray for them.

Everything will be Ukraine!

March 6, 2022

11th day of the war.

Today at the front came what the military calls an "operational pause." The situation is that the occupiers can no longer advance, and we cannot yet advance.

Although in some areas, in particular near Mariupol, Kharkiv and Sumy, our army went on the counterattack today. The occupiers, leaning on a fierce defence, got stuck everywhere. So they set out to regroup their efforts to focus on at least one direction and achieve at least something. And now their choice – attacks on Mykolayv and offensive north of Mykolayv for the purpose of capturing

one more nuclear power plant which is for 100 km from Mykolayv in the town of Yuzhnoukrainsk - the Yuzhnoukrainsk nuclear power plant.

The general background of the events is the continuous shelling of large cities. These are Chernihiv, Kharkiv, Ovruch, Bucha, Korosten, Starokostiantyniv, Vinnytsia, Kyiv, Mariupol, Kramatorsk. This is their model of war – intimidation and mass extermination of civilians, which they recently did in 2016 in Syria and a little earlier, in the 90s in Chechnya. As the beastly horde has been for centuries, so it has remained. Nothing changed. No ideas of humanity, honour and dignity. For Russians, these are signs of weakness and a reason to cheat and kill. Therefore, it is not surprising that today, on the second day of attempts to organize a "green corridor" for the evacuation of civilians from Mariupol and Volnovakha, this green corridor was shelled. This is a special cynicism of bullying defenceless civilians, whose infrastructure for life has been completely destroyed. Today they bombed the main gas pipeline of Donetsk region, leaving the whole region without heat in winter. What is called, no comments.

The situation on the northern outskirts of Kyiv is even more terrible – the cities of Bucha, Gostomel, and Irpin, which have been the epicentre of hostilities since the first day of the invasion. There is a terrible humanitarian catastrophe. Of course, there is no electricity, no heat, no water, no food. And most importantly, the occupiers do not allow the evacuation of civilians, especially children, and the wounded, as a result of which two children have already died. Moreover, outraged that they were unable to advance into Kyiv, they began shooting at locals, especially those desperate to escape. This is exactly the same mode of warfare that the German fascists demonstrated in World War II. Today, our soldiers withdrew from their positions in order not to be exposed to enemy artillery shelling of residential buildings in these towns.

And in the south the situation is quite the opposite. In the occupied cities of the Azov region – Kherson, Primorsk, Berdyansk – thousands of people with Ukrainian flags demonstrate and protest in front of armed aggressors on tanks. Today Nova Kakhovka, Novoalekseevka, Kalanchak, Troitske also went to such protests.

Today, air strikes on Starokostiantyniv and Vinnytsia airports were added to the usual bombings, as a result of which they were completely destroyed. And for the first time they fired on the city of Pokrovsk, Donetsk region, on the border with Dnipropetrovsk region, with cluster bombs. Today, for the first time, the administrative capital of Donetsk region, Kramatorsk, was also subjected to massive bombing. There are dead and wounded.

The only real advantage of the occupiers today is the sky. In Syria, they were the monopoly rulers of the sky, and now they didn't like the fact that their fighters and bombers started shooting down. Only near Odessa today two fighters were shot down. One attack aircraft was shot down near Chernihiv. And two more planes. The aggressors are furious that relative parity has already come in the air. Closing the sky today is crucial to our struggle. Because in general, they fight like the traditional Red Army, which is the Soviet army, whose main style is to throw their cannonballs at the enemy. The Ukrainian army is far behind in numbers, but successfully compensates for this through professional and skillful warfare. As a result – in yesterday's battles near Mykolayv they lost 2 planes, 4 tanks, a large number of infantry fighting vehicles, 70 dead and 300 prisoners. Our losses – 3 wounded.

Hold on, keep calm, help the army.

Everything will be Ukraine!

March 5, 2022

The tenth day of the war.

The main areas of the current war are Kyiv and Kharkiv, which are relatively stable. Defensive arc around Kyiv: Borodyanka, Irpin, Bucha, Vorzel, Gostomel today is a place of positional battles – the occupiers are still making persistent attempts to attack, but the Ukrainian army is holding them steadily. The humanitarian situation in Kyiv is also stable – there is electricity, gas, heat and water everywhere, including hot water.

Near Kharkiv, our army counterattacked and captured the remnants of Russia's elite tank troops. Although the enemy continues to systematically bomb Kharkiv, today, in addition to residential neighbourhoods, the dormitories of Karazin University and its sports complex were destroyed. Of course, there are dead. Many areas without electricity, heat and water. There is a catastrophic lack of food.

At night fired at Mykolayv, in particular and cluster bombs. 4 helicopters and one plane were shot down near Mykolayv today, several columns of enemy equipment were defeated. One of the pilots of the plane was taken prisoner, it turned out he was bombing Syria. The whole of Ukraine applauds!

One Russian plane was shot down over Chernihiv. In general, Chernihiv and Sumy – the closest cities bordering on Russia since the first day of the war are under massive enemy fire. Chernihiv is an ancient city of Kievan Rus, which houses the temples of the 10th century. The city is half destroyed, there is no electricity and heat. But it continues to resist, thus closing the way to Kyiv for the occupiers. That is why the Russian authorities are punishing the city to capitulate and invite mercy. The city has no electricity, gas, heat or water, but it is heroically resisting.

The city of Sumy and some strategic cities of the region, such as Okhtyrka, are under terrible destruction. As they are closest to the border with Russia, it is easier to carry out air bombardment and shelling from there. These cities also lack electricity, gas, heat and water. We see here methodical and PURPOSEFUL waging war against civilians through the destruction of critical infrastructure of their livelihood. Therefore, it is vital to block the aggressor's sky, in which he has the upper hand today.

**Our greatest request to all people of good will on the planet – help us close our skies to the enemy!**

Terrible situation in the occupied city of Trostyanets, Sumy region. Here, the occupiers are behaving openly brutally – they destroyed communal infrastructure, looted grocery stores, shot people in the streets and did not allow their bodies to be taken away and buried. So obviously they are intimidating the residents to break them and force them to submit.

Zhytomyr, on the border with Belarus, was also bombed systematically today. There were destroyed 16 houses, a school №25, Zhytomyr Armoured Plant and a military lyceum.

The districts of Kherson and Zaporizhia oblasts, temporarily occupied in the previous days, impress Ukraine and the world with their resistance and heroism. The coastal towns of the Azov region of the Zaporizhia region, Melitopol, Primorsk and Berdyansk, under the Ukrainian flag, demonstrate to the occupiers that they are not happy here, that Ukraine is here, and demand to withdraw. Unarmed people stand up against the armed occupiers and demand them! Kherson is impressive today – 5,000 residents of the city with Ukrainian flags came to the central square in front of the administration occupied by the occupiers and chanted "Kherson is Ukraine!", "Get away!" Even the warning shots in the air did not intimidate people, they drove the occupiers out of the city, where they will be destroyed by guerrillas at night.

The invaders are committing not only humanitarian terrorism against the civilian population, but also nuclear terrorism. Thus, the Chernobyl nuclear power plant occupied on the first day of the invasion is under the control of the occupiers. They do not let the captured staff of the station go home to the town of Slavutych and do not allow its rotation according to IAEA protocols. But the most impressive is the invasion of the occupiers in Energodar – the city of nuclear power plants of the Zaporozhye nuclear power plant, which they fired on from tanks yesterday. The occupiers occupied the mayor's office as if they were in power here, and in the morning did not let the mayor and employees of the mayor's office there. After all, the city hall is warm and cosy, and they, apparently, froze and tired, riding for 10 days in our country on tanks. In some neighbourhoods there were power outages and heat, so the mayor's office and utilities worked to ensure these issues were resolved. The head of the regional administration of the Zaporizhzhia region said that in the evening the mayor and employees of the city hall returned the premises of the City Council and they were able to return to their offices. Meanwhile, it was reported during the day that the Kadyrovites who seized the nuclear power plant had mined the station. We will monitor this.

But the most egregious events of today are the treacherous disruption of the evacuation of civilians from Mariupol and Volnovakha, which was agreed yesterday in talks with the official delegation of the Russian Federation. Well, we have known the price of the Russian word since August 25, 2014, when the word of a Russian officer guaranteed a "green corridor" for the Ukrainian military near Ilovaisk, all of whom were treacherously shot. Today, under the auspices of the Red Cross, it was planned to transport civilians from Mariupol and Volnovakha to Zaporizhzhia by 11 a.m. to 4 p.m. Kyiv time. But the Russian occupiers began shelling both Mariupol itself and the "green corridor" that was supposed to take people out of the war. God, save Mariupol!

Hold on, keep calm and help the army.

Everything will be Ukraine!

March 4, 2022

Ninth day of the war.

After yesterday's fierce battles in the main areas of Kyiv and Kharkiv, the Russian occupation army has lost its ability to advance. Russian elite tank troops were defeated near Kharkiv so that the Cantemir Division no longer exists. Therefore, only positional battles continued here today – attempts at an offensive breakthrough were not made. Today, checkpoints made of concrete blocks and anti-tank hedgehogs are being built in Kyiv. Kyiv is preparing for defence.

The hottest spot today is Mariupol. He is almost surrounded, but not yet under siege. It seems that just as Kharkiv was transformed into the 21st century Stalingrad, so Mariupol, which the Russians believed should not be taken because it would be met with "bread and salt", is now being turned into a besieged Leningrad.

Events around the city of Energodar, where Europe's largest nuclear power plant is located, unfolded dizzily. In the evening, the Ukrainian army began fighting with the fiercest formations of the Russian occupiers, the Chechen Kadyrovites. The occupiers fired from tanks at the first block of the nuclear power plant. The fire started there and the invaders did not let the firefighters put it out. Were it not for the endurance and heroism of our people of nuclear power plants, it is scary to think what would have happened to Europe – Chernobyl would have seemed an easy problem. Of course, we already understand that we are dealing with a new version of fascism, but to shoot at nuclear power units is overwhelming. Kadyrovites bombed the station's administrative building and its training centre. In addition, the military enlistment office and the police department were blown up in the morning. In the morning the fire was extinguished.

Today is the first day when Kherson is under occupation. They disconnected the region from Ukraine's TV and Radio network and turned it on instead and began broadcasting their racist television with its massive anti-Ukrainian propaganda. Mobile disabled. Some food parcels called "humanitarian aid" were brought to the central square to show charity. This is a fantastic logic – first we will ruin your life, and then we will give you a handout so that you understand how grateful you should be. No one came for these products, except for 20 people with Ukrainian flags, who said that the citizens would take only Ukrainian humanitarian aid and left. It is clear that the racists did not allow to bring Ukrainian humanitarian aid. Today the whole country admires Kherson!

I am no longer writing about the constant bombing of large cities, because it has already become commonplace. But this is our most pressing problem today. Problem from the sky. Our army is successfully coping with the occupiers on earth, but the sky is a problem! Here we need urgent help. We need to close the skies over Ukraine!

We keep calm, hold on, support the army. Everything will be Ukraine!

March 3, 2022

The eighth day of the war.

Unfortunately, the connection with Mariupol was lost last night. It is under siege, there is no electricity, no heat, no mobile communications. Yesterday the city was shelled for 20 hours. There is a lot of destruction and deaths of civilians. But the most glaring problem is that they do not allow the civilian population to be taken out of the war zone. In the 21st century, this is hard to believe, but we are dealing with the fascist technology of warfare, when it is primarily waged against the civilian population. Mariupol highlighted this most clearly, although it has been going on for all eight days of the war – after the destruction of small towns of Shchastia (Happiness), Volnovakha and their occupation, the occupiers do not allow to remove from these ruins, where life is impossible, the remains of civilians. In all attempts to take him out, the occupiers start firing on buses, which our local authorities are trying to take people out of the epicenter of the war. We need help with this.

Kharkiv and the region were shelled again – only today 40 houses were destroyed in Kharkiv. In addition, they destroyed the civilian airport near Kharkiv and Korotichi – children there joined the aviation issues. Also today the city of Izyum got especially – it was torn apart almost as Kharkiv. It is the city centre and apartment houses. What to say if they are already bombing the villages – they almost completely bombed the village of Yakovlivka. In addition, near Kharkov are positional battles of elite units of both armies. And so far the occupiers cannot move forward, even despite the almost carpet bombing of Kharkiv and the region. The behaviour of the occupiers is so anti-human that in the morning the Ukrainian Special Forces announced that they would not take Russian artillerymen who fired on Kharkiv. Their names and home addresses are known. And even if they survive the war, the fate of the dead civilians of Kharkiv awaits them.

Kyiv. This is the main goal of this round of war – the capture of Kiev. Fierce positional battles continue for Kyiv. In general, the Nazi occupiers concentrated 55% of their troops around Kyiv and Kharkiv. In Kyiv itself, the situation has stabilized – our territorial defence has established a checkpoint and is monitoring the situation. Today the leader of sabotage groups of Kyiv was arrested, the city has already been cleared of them. Food and medicine are delivered. The main thing is stable electricity, heat and the Internet. Transport works. Today, traffic on two bridges across the Dnieper has even been resumed.

Kherson. It is occupied. The occupiers are robbing grocery stores and fighting civilians protesting against them, killing 200 people. All territorial defence was demonstratively destroyed. Mining is

carried out in the center of the city, for example, streamers are installed in front of the regional TV and radio company.

In the evening, the occupiers shot at a checkpoint in front of Energodar and entered the city. They are said to have been ordered to shoot at civilians trying to stop them. Fighting is going on in the city now.

The Ministry of Education of Ukraine reported that 160 schools have been destroyed so far, the eighth day of the war! This means that they are destroying 20 schools a day!

Hold on!

### March 2, 2022

The seventh day of the war. The Social Democrats, like the whole of Ukraine, are fighting the occupier all over Ukraine on various fronts and positions.

All night the Russian occupation forces raised the Kharkiv, Zhytomyr, Sumy, Chernihiv, Donetsk and Mykolayiv regions, as well as the city of Kyiv. Kharkiv, which turned out not a Russian but a Ukrainian city, is particularly affected by apartment buildings, one of the buildings of Kharkiv University named after Karazin, the Palace of Labor (regional office of trade unions), Kharkiv City Council, regional police department and the Security Service in Kharkiv region. In addition to the city center, the sleeping areas of Kharkiv – Saltivka and others were shelled. They bombed houses, a school and a dormitory. 4 people died and 15 were injured. On the positive side, three of the six planes bombing Kharkiv were shot down. Two pilots were taken prisoner and a third was shot dead.

In Zhytomyr, 10 residential buildings, the city prenatal center and the city hospital №2 were damaged, the Korosten checkpoint of the Zhytomyr region was bombed, and some people died.

The occupiers slipped around Kyiv and practically stopped, moreover, they were driven out of the previously occupied city of Makariv near Kyiv. In the evening, the Kyiv railway station was bombed, from which refugees are being evacuated to the west of the country. The racists are stubbornly but unsuccessfully trying to instill in Kyiv the disorganization of state institutions, the desocialization and dehumanization of the people, and sow chaos and panic.

Mariupol was surrounded and under fire ALL DAY. There is no heat and no mobile communication.

All day Severodonetsk and Lysychansk (Luhansk region) fired by Hails and the Tornado installation

The only direction in which the rucists were able to advance - Mykolayv region in southern Ukraine. An airborne landing party was landed there today by two helicopters, which was neutralized. Some of these paratroopers were taken prisoner.

Odessa is preparing to land a rucist naval landing party, because 11 military landing ships approached Odessa, but still waiting due to a storm.

Kherson was repulsed in the morning - the occupiers were driven out of the city, leaving only the railway station and the river port. Rashists surrounded Kherson and, not being able to gain a foothold in it, went further in the country to Mikolayv.

Today, the rucists also approached Energodar town, where Europe's largest nuclear power plant is located. They were met by the mayor in the company of 5,000 residents with Ukrainian flags and told to leave because they would not be allowed to enter Energodar. They retreated. Glory to our atomists! We have been working with them since 2013 and we know each other well, they are our students.

As of today, Ukraine begins a movement of resistance against the occupiers in the temporarily occupied territories. Their task is to neutralize the rear positions of the rucists in order to paralyze the combat capability of their regular units.

In the temporarily occupied city of Trostyanets, Sumy region, right on the border with Russia, the occupiers came to the city council with a demand to transfer power to them in the city, which was refused. Worst of all, they are looting local grocery stores and walking around apartments, driving residents out into the streets to form a living shield against the Ukrainian army, as they did in Donetsk and Luhansk 8 years ago.

We are fighting and winning. Everything will be Ukraine!

### March 1, 2022

The sixth day of the war. Chronicle of events:

1. The Republic of Belarus entered the war against Ukraine and in the morning a column of 2,300 tanks advanced towards Kyiv and Lutsk.

2. Kharkiv - Freedom Square and Kharkiv Regional State Administration, as well as the residential district of the city, the Opera House and the Regional Philharmonic were shelled in the morning to punish disobedience. Opera! About 11 dead and 30 wounded.

3. The occupiers finally entered Kherson. This is a regional center that has been under siege for 4 days. At intersections, checkpoints are set up and people are shot to the right and left. Extreme situation around Sumy. There is a lack of artillery, aircraft and anti-tank equipment in general. The city is defended only by territorial defense. In fact, people only fight with small arms. It seems that all Ukrainian troops have been mobilized to defend Kyiv.

4. An important component of the resistance is the round-the-clock broadcasting of national television, which is carried out jointly by the largest Ukrainian channels. To break it, the main TV tower of Ukraine, which is located near the famous Babyn Yar, where the Nazis carried out mass shootings of Kyivites, was covered and damaged at noon. 5 dead, 9 wounded.

5. Intense battles for Mariupol. The electricity and heating networks have been out of order since the morning, so the city is without electricity, heat and internet all day in February. In the evening, due to the fact that the artillery system Point U fired at the troops of the Russian Nazis in occupied Berdyansk, 90 km from Mariupol, Mariupol became quieter. And in the evening in the city the electricity is partially restored, but not heat and therefore people now, in the winter while sit without heating.

6. During the day, the traditional bombing and artillery shelling of not only large cities of Ukraine, but also methodical shelling of smaller cities of Kharkiv region - Chuguev, Lozova - continued.

We are fighting and holding on. Glory to Ukraine!

### February 28, 2022

Fifth day of the war. Ukraine not only coped with the initial shock of surprise, but also organized effective self-defense. And since yesterday we can say – began to attack. First of all, because it cleared Kyiv of sabotage groups and forced the offensive forces of the Russian regular army to retreat from Kyiv, the main direction of the attack. The same was achieved in Chernihiv, Sumy and Kharkiv, especially fantastic that the occupiers were driven out of Kherson.

Tragic losses last night – the temporary capital of Luhansk region – the city of Shchastia (Happiness) due to rocket bombings destroyed by 80%. The city of Volnovakha in the Donetsk region was completely destroyed after the bombing.

Today it has become clear to us that we are not having an ordinary conventional war, but a punitive operation to pacify Ukraine with the aim of its colonization. This conclusion is suggested by the fact that cities that do not surrender, such as Kyiv, Chernihiv, Sumy, Kharkiv and Odessa, are subjected to educational bombing the next day. The bombing of Kharkiv with vacuum and cluster bombs, which are prohibited by international conventions, was particularly impressive today. It should be emphasized that these measures and all other measures of the occupiers are aimed primarily at intimidating the civilian population, its dehumanization. That is why residential neighborhoods, kindergartens and hospitals are being bombed in the first place, and all over Ukraine, so that there is an understanding that there is nowhere to hide. Russians are skillful traders of Fear. They are virtuosos of disorganization and panic. In fact, it was their main weapon in the invasion, but it worked only on the first day, but did not ensure success. Now the level of national cohesion and overall consolidation is unprecedented. All citizens feel like one family because they realize that our common home and our common life are at stake. And day by day the fighting and national spirit grows disproportionately, when women and men without any weapons meet the occupiers and drive them away, sometimes even whole tank columns. What is the spectacle of fifty Berdyansk residents singing the Ukrainian national anthem in the square in front of the City Council for a column of Russian occupiers who entered the city this morning and blocked the entrance to the City Hall and the entire central square along its perimeter with their tanks. Today we have every citizen – a warrior who does everything he can and gives for the front and victory, too, everything he has. Because there is a threat to the most precious thing for us – our and not only our Freedom.

The enemy will not pass and everything will be Ukraine!

February 27 2022

The fourth day of the war. Kyiv. Yuriy Buzdugan, Leader of the Social Democrats of Ukraine.

We were attacked by a country that is 3 times bigger than ours in terms of population, 12 times bigger in terms of territory, and 10 times bigger in terms of economy. But we are still fighting for our Freedom.

On the fourth day, you can already see how the aggressor's tactics are changing. At first, they tried only to block the border towns in order to keep the forces for rapid advance into the territory of Ukraine. It is impossible to say that they did not succeed. They blocked part of the border cities (not all), but from 9 directions of the offensive (Volyn, Zhytomyr, Kyiv, Chernihiv, Sumy, Kharkiv, Luhansk, Donetsk, Crimea) they were able to advance only in the latter one.

But this progress has stopped. Because the Ukrainian army has found an effective answer. After the breakthrough of the defense of Ukrainian troops, Russian columns are advancing further. But the place of the breakthrough is closed again and Russian troops are left without fuel and ammunition. So this breakthrough did not become a breakthrough outside the Kherson-Energodar-Mariupol triangle. Parts of Russians who went further, for example in the direction of Mykolayv (only 65 kilometers from Kherson) can't gain breakthrough force and do something.

Therefore, Russian troops have moved from a strategy of "deep advance" to a strategy of "terror of the civilian population of the surrounding cities." Rocket and artillery attacks on residential neighborhoods began. And the Russians are beating not only in residential buildings, but also in hospitals and kindergartens. For example, a large column of smoke from a fire could be seen from my

window two hours ago after another ba-bah 1-2 kilometers away, but now it is gone, so it was extinguished.

Particularly dangerous are groups of terrorists who came to our cities before the war. They are not able to capture the cities, but they seize ambulances and police, change into Ukrainian uniforms and shoot random civilians at night. For example, a family with three children was shot dead in Kyiv that night. They were shot - both parents and one of the children were killed and two others were injured. This is a change in the tactics of the Russian army.

Against this background, Ukrainian politicians are happy. Before the war itself, President Zelensky began prosecuting his predecessor, President Poroshenko. But yesterday they met and agreed on joint action.

In general, Ukraine had two internal weaknesses. The first is the radical rejection of the government and the opposition, which I have already mentioned. The second is the fierce confrontation between the North-Western (Forest) and South-Eastern parts of Ukraine (Steppe, or, as Putin calls it, Novorossia) in the early 2000s. It is on this confrontation that Putin made his main bet, both in 2014 and in 2022. But even here his hopes did not come true. I already wrote that in the south-eastern cities – Mariupol, Kherson, Nikolaev, Odesa there were more people wishing to fight for Ukraine than stocks of the weapon for territorial defense.

Ukraine is holding on.

But we need your solidarity!

Even a simple greeting will be conveyed to the Ukrainian Social Democrats throughout Ukraine and will strongly support us.

I would like to thank my comrades from Finland, Switzerland, France and Italy who sent a message in support of Ukraine.

### February 26 2022

The night of February 25-26, the second night of the war was a turning point. From the first day of invasion, it became clear that the main target of the INVASION 2022 invasion was Kyiv. Therefore, if on the first day the war began with many centers of invasion along the entire perimeter of Ukraine's border, except of the western borders, the second day was marked by the concentration of efforts of the Russian army to capture Kiev. The plan called for the capture of airfields, especially around Kyiv, to land masses of Russian troops there to take Kyiv. Therefore, on the first evening around Gostomel, where the airfield 10 km from Kiev were fierce fighting. As this has failed, the fighting began for the military airport in Vasylkiv, 30 km from Kyiv. Two IL-76 planes with a military landing party arrived there - one of them was shot down, the other began to land and Vasilkiv passed from hand to hand. It is noteworthy that the occupiers are disguised in Ukrainian military uniforms and not only in Vasylkiv. In addition to the battles for Vasilkov, two more battles determined how events would unfold. These are the battles for the Kyiv CHP-6, which provides heat to half of Kyiv, and the battles for the Kyiv Dam. If our army had not protected them, more than half of Kyiv would have been deprived of heat and the other half flooded by the waters of the Dnieper. Another 6 km from the government quarter, a Russian sabotage group tried to take a military facility and give Kyiv the impression that Kyiv had already been lost and that we had all become hostages. Not to mention air strikes with ballistic missiles in Kyiv, Kharkiv, Rivne, Odesa, Mykolayiv and many other cities of Ukraine.

On the third day of the war, everyone realized that there was no safe place in Ukraine. Russian missiles hit anywhere on our earth. Russian troops captured a small area, but the FEAR spread to all

Ukrainians. But this fear had not become the dominant feeling. The desire for Freedom is stronger. Solidarity is stronger. People help each other. Our activists from Mariupol together with the military are defending the city. Today, this city is probably the most attacked by Russian missiles and shells. Activists are hosting strangers from the East Quarter, where hurricane shelling is taking place.

The 2022 invasion is happening as a complex of many components. In addition to the onslaught of Russia's regular ground forces, the second decisive factor in the attack on Ukraine is the activities of reconnaissance and sabotage groups, whose goal is primarily to destabilize the situation with small forces, sow panic and chaos in managing the situation. They are also correctors and gunners for air bombing, which is the most vulnerable factor for us today. This is an air hazard.

Already today, on the third day, we can see and claim that they are shelling mainly three categories of objects. These are primarily military infrastructure - airports and ammunition depots, the second category - critical civilian infrastructure - heat power station, dams, gas and electrical communications to leave people in Kyiv without heat, water and electricity and, thirdly - kindergartens and homes. Moreover, the shelling is carried out throughout Ukraine, up to the western regions of Lviv, Rivne, Lutsk and Ivano-Frankivsk. This creates a feeling of total danger when it is clear that nowhere in Ukraine can one hide from artillery shelling. Ukrainians are shocked by this style of warfare, when it is mainly aimed at intimidating people with brutal threats. Today, on February 26, we have 198 military and civilian casualties, including 33 children. Especially after the shelling of kindergartens in Okhtyrka and Bucha. The occupiers have 3.5 thousand dead and 200 prisoners.

A strong contrast is the Russian occupiers. They behave like irresponsible children. They behave as if they can do anything and do not know the word "responsibility". And they get hysterical when it comes to them that they will have to answer for their actions. Not only prisoners. They rob stores and immediately ask Ukrainians for food. And when they are told that they are wrong, that they are not happy, they are shocked. The biggest crime they commit, apart from shelling civilians, is that they disguise themselves in the uniform of the Ukrainian army, police and start shooting people. And he considers it normal.

It is very significant that Ukrainians from the South and the East, where the majority speak Russian, do not support the invasion. There are so many people in Odessa who want to enroll in the territorial defense that their enrollment was stopped yesterday. They only take phones to communicate in case of need. The situation is the same in Nikolaev. There, too, the territorial defense staffs are overcrowded and battalion recruitment has stopped. The spirit of Ukrainians is surprisingly strong. It is now clear that Russian saboteurs had been in all Ukrainian cities before the war and are now firing, creating a sort of invasion of the city by regular Russian troops and blocking free entry. But no regional center was captured, people are resisting everywhere. Even Kherson, which was under siege on the evening of February 25 and where the occupiers hung out their flag, was released in the morning and returned the flag of Ukraine. Currently, street fights are taking place in two regional centers in the north - Chernihiv and Sumy, which were besieged the day before. People are constantly told that in the cities of the Sumy region, the occupiers are scattering bright toys, mobile gadgets and other valuables filled with explosives. People are warned never to touch these things. Together with attacks on civilian infrastructure and shelling of homes and kindergartens, this is a culmination of the methods of humanitarian terrorism that we are amazed at. Everyone in Ukraine could not believe that this could be done to the civilian population.

Finally, we must say how the people of Ukraine act. This is an incredible national consolidation - all those who were once enemies and competed with each other, stood shoulder to shoulder. The military - the army and the defense are at war, civilians serve their needs, fulfilling all orders, providing everything necessary - building fortifications, delivering fuel, food, water - everything they

need. Every citizen, without exception, regardless of age, gender, social status, etc. participates in the defense of the country, doing everything he, or she can. Everyone gives everything they have to defend the Freedom and Independence of Ukraine. There is an atmosphere and relationships that happen only in a friendly and loving family. Everyone helps everyone who needs help, even though they are complete strangers. Today we are defending our country from the horde and we are grateful to everyone who stands next to us.

EVERYTHING WILL BE UKRAINE!

February 25, 2022. The day has passed since Russia's war against Ukraine began.

We receive information only from official sources, and from our activists from Mariupol in the south to Slavutych, where the workers of the Chernobyl nuclear power plant live, in the north of Ukraine. You can already see the first trends and make the first generalizations.

The first generalization that everyone is talking about is that the blitzkrieg has failed. New ones in the south, near Kherson, where the greatest advance of the Russian military took place, stopped them. Their main bet - to strike a blow and capture even Kyiv, and only the government quarter and make a picture of "the head of the new Ukrainian government signs the capitulation" – has failed. Yesterday Russian paratroopers seized the airfield in Gostomel, 10 kilometers from Kyiv, where they began to gather troops to break into the government quarter. But the Ukrainian army destroyed this landing and recaptured the airport. Now they are going to Kyiv directly from Belarus, but they have been stopped so far. Now they are fighting there. The first day showed that their bet is on capturing airports, through which they are then going to land their landing. Yesterday they tried to capture Gostomel - the gateway to Kiev and Mariupol airport. Fortunately, this can be repulsed. Now the fighting is over Sumy airport - the regional center in the east.

The second generalization is the general mood: "The West is not only a military force for us, but sanctions are not" hell "at all. But we will still fight. " If Ukraine does not receive real help in the near future, relations with the West will be severely damaged. This is not about the Ukrainian government, but about the people. And the first thing we need is protection from Russian missiles, planes and helicopters. Because Russian missiles are already firing on residential areas of Kyiv.

The Chernobyl nuclear power plant was seized yesterday. Today there is an increase in the radiation background.

The third generalization is that Ukraine will fight. In Kyiv alone, 10,000 citizens received weapons in one evening and joined the formation of territorial defense. The spirit is extremely high. In the city of Okhtyrka, Sumy region, a unit of irregular Ukrainian military recaptured its city from Russian strike units.

We need your solidarity! A new simple greeting will be conveyed to the Ukrainian Social Democrats throughout Ukraine and will strongly support us. I would like to thank my comrades from Finland and Switzerland for announcing letters of support and friends from France who announced their rally in support of Ukraine.

The next few days will be crucial for Ukraine and all the world.

Tonight, February 24, 2022: WAR AGAINST UKRAINE

Tonight, February 24, 2022, the Russian Federation attacked Ukraine not only with rocket and bomb strikes. Attacks were made not only on military infrastructure facilities - airfields and military depots, but also on cities - Kiev, Dnipro, Nikolaev, Lutsk, Ivano-Frankivsk, Uman, Chuguev, Shchastia, Mariupol and others.

As you can see, not only along the perimeter of our borders with the Russian Federation and Belarus, from the territory of which the attack will also be carried out, but also inland. The attack is carried out from the south, east and north of Ukraine. There are first casualties on both sides. Our Armed Forces shot down 7 military planes of the Russian Federation, now the battles are going on for Zmeiny Island. The time of diplomacy ended with the first explosions. A hot conventional war began.

The Parliament of Ukraine - the Verkhovna Rada introduced martial law. We are subject to massive hacker attacks and fake news attacks. But there is no panic, all state, municipal and economic bodies of Ukraine and transport are operating normally. All civilians who are able to hold weapons gather at the assembly points. At 11.30 Kyiv time, Russian troops launched an offensive from the south to Kherson and Melitopol. They are also advancing in the northeast in the Chernihiv and Sumy regions. There is fighting near Kharkov and 4 tanks of the Russian Federation were knocked out there. The main thing that everyone needs to know is that we will not give up under any circumstances. Neither military nor civilian.

WE WILL FIGHT

GLORY TO UKRAINE

--
